Programming | *Java, Python, Ruby, JavaScript*

Concepts | *Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Software Design Principles, Database Systems*

PROJECTS

Farm Animal Location Tracking System using GPS

Developed a system to help shepherds track grazing animals and prevent road accidents. Integrated GPS and vibration sensors to provide real-time location data and safety alerts.

Task Management Application

Built a web-based task management solution using PHP and the Laravel framework to streamline task tracking, project organization, and team collaboration. The application improves productivity by simplifying workflow management for individuals and organizations.
